

Unborn babies are human beings and can feel pain

Watch an amazing 4D ultrasound video:
www.truthbooth.org/video.asp

Your Baby's Development:

Conception – A unique individual, your precious child, was created!
3 weeks from conception – heart is beating
6 weeks – brain waves can be measured, baby moves away when touched
7 weeks – baby can hiccup
8 weeks – all organ systems are present
9 weeks – baby can yawn and suck
10 weeks – unique fingerprints are forming
12 weeks – major organ systems are functioning, baby can smile!

*Love is not happy with evil,
 but is happy with the truth.
 Love never gives up;
 its faith, hope and patience never fail.
 1 Corinthians 13:6-7*

Look at your ultrasound...

*"A person's a person,
 no matter how small."
 ~ Dr. Seuss*

If you are in an abortion center right now, you can just leave! You don't have to tell anyone inside. If you have already paid for the abortion, we can help you get that money back.

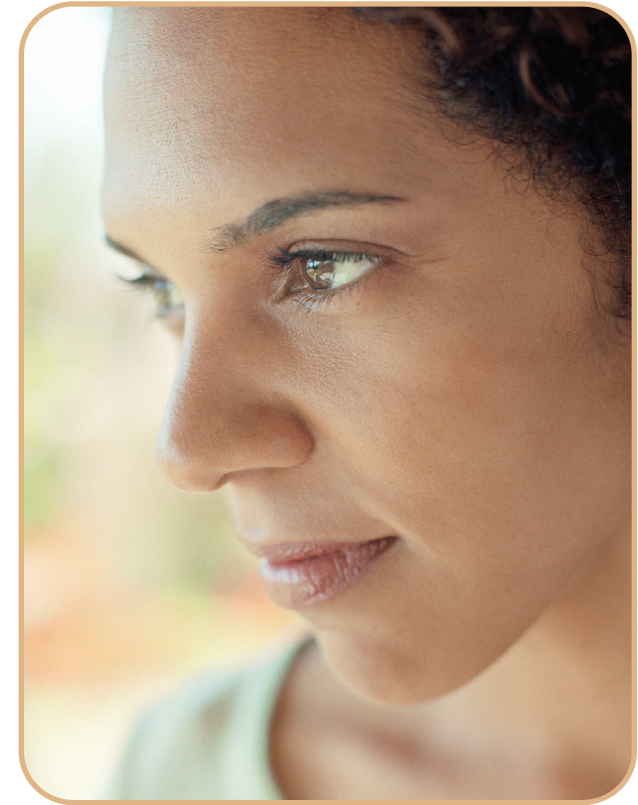

We understand that this is a difficult situation and we want to help you!

Please come outside and talk with us, call 800-712-4357 or call the number below.

Possible Emotional and Spiritual Consequences of Abortion

"I, too, was just like you – frightened, panicked and feeling all alone. Despite their claims, you know in your heart that what is growing inside you is your baby. Don't make the same mistake I made by letting today's temporary circumstances force you into a decision to kill your child, a decision that you will eventually regret. Abortion was not the answer. It was a cruel and permanent harm to my child, and it left me with shame, anger, self-hatred and hopelessness. Today you have help I never had. Listen to the real friend who gave you this brochure."

Hurting from a past abortion?

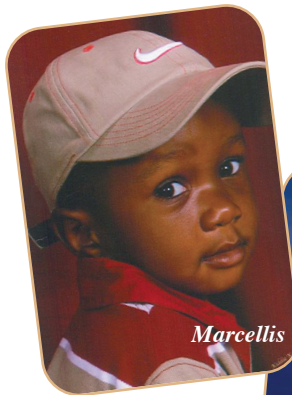

www.rachelsvineyard.org
or 877-HOPE-4-ME (877-467-3463)
Healing can begin today by letting *this* baby live.

Your unborn child is an unexpected treasure that God has entrusted to you...

He or she needs your care right now. Don't let the abortionist harm your baby.

8 weeks

Marcellis

THOUSANDS of women have **NOT** kept their appointment with the abortionist.

Lina

These children are alive today because their parents changed their minds about abortion!

They have kept their babies instead!

Leslie & Lea

You have the right to have your baby.

Don't let *anyone* deprive you of the love of your son or daughter. When you are holding your baby in your arms, you will know you did the right thing and you will have peace with God. You will feel proud that you endured a tough situation and gave your child life!

(If you would like to talk about adoption, we can help.)

Choose Life - Choose Love!

The Abortion Pill ("Medication Abortion")

Even if you've already taken the first drug (mifepristone), it may not be too late!

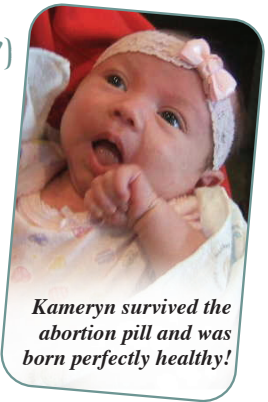

Thousands of babies have survived the first drug and are perfectly healthy.

Don't take the second drug (misoprostol)!

Instead, call this 24-hour helpline right away for help in saving your baby: **877-558-0333**

www.abortionpillreversal.com

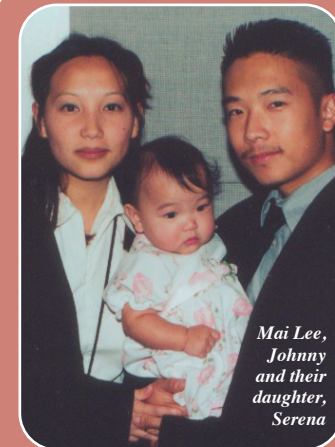

Watch what the abortion pill can be like for the woman: www.abortionpillhurts.com

Kameryn survived the abortion pill and was born perfectly healthy!

Second or Third Trimester Abortion

No matter what the abortion center tells you, laminaria dilators **CAN** be safely removed by a competent doctor, allowing your pregnancy to continue normally. Even if you've received an injection to kill your baby or you've taken medication to help open your cervix, your baby may still be alive! Let us direct you to a doctor who can help!

Mai Lee, Johnny and their daughter, Serena

"Removing those laminaria dilators was one of the most important choices I have ever made in my life, and five months later a beautiful baby girl was born to me. Serena is such a joy in my

life and I thank God for blessing me with her. Each and every day Serena continues to be the example to our friends and family members of how precious life really is."

– Mai Lee Yang
